THE NEW

CUTTER.

The establishment of a Cutting School in Lehighton has been instrumental in more fully arousing public sentiment upon one vital question than has ever before been aroused, namely: THE PRACTICAL EDUCATION

FOR WOMEN." Appealing to your most candid judgment, parents, have you educated your daughters in such a manner that they can earn a good, honest living by their own of forts, if such a thing should become necessary, for little do any of us know what is in store for us? It is a refined accomplishment for any lady to be able to look after her own cothing and see that it is made correctly and in becoming style, and there is no education that prepares any lady for the responsibilities and duties of life equal to knowing how to construct her own to knowing how to construct her own

clothing properly.

It is only the second consideration co clothing, and this is of the highest importance to all, and might mean very much to some of our readers. It is an attested face that the Cutting School is a harbinger of good wherever established, and the price of the thorough course of instructions given is merely nominal compared with its great value which is clearly demonstrated by the best judgment of some that have a ready been defined.

be a Socialist. He alarmed us one day by saying, "Before another century shall turned. This social revolution will begin in Germany, I am sure, for German Socialists are the most determined. books are all written in pity, for I have carefully studied the miseries of miners. the miseries of all workmen. The revoution of 1789 did nothing for the working classes, I mean the ouvriers. The peasants obtained land; the ouvriers lost privileges they had formerly enjoyed. Let us hope that this social transforma-tion will come without bloodshed, for otherwise what may occur I know not."
